An Imprint of Teacher Created Materials

To **Create** a World ⁱⁿ _{which} **Children** **Love** to **Learn!**

Welcome to Teacher Created Materials

For over 45 years, TCM has dedicated itself to crafting educational materials that ignite a passion for learning in children worldwide. With an extensive library boasting thousands of titles covering diverse content areas and genres and meeting the varied needs of today's students, our collection stands as a testament to our commitment to education.

TCM controls all rights to Teacher Created Materials, Shell Education, and Free Spirit products.

Distribution and rights agreements available:

Unleash Curiosity during Storytime!

- Enhance cognitive, social, and emotional growth.
- Impart valuable life skills and knowledge crucial for school readiness.
- 49 titles available!

The tiny chameleon and her 24 brothers and sisters grew up very comfortably in their jungle home. They nimbly grabbed vines and branches with their feet to walk up and down the forest. They nabbed bugs from the air with their lightning-fast, extra-long tongues. They looked every which way all at once with their every-which-way eyeballs.

They were *Aggy!*

But what's this? The little chameleon spied a book of pictures on the forest floor. And then she grinned the biggest grin a teeny-tiny chameleon can grin.

LICENSING INFORMATION

- 49 titles
- Spanish Titles Available Winter 2025
- Ages 4-6+
- Publication Date: August 2024
- Paperback • 24-28 pages

Family Engagement

Extend the fun and learning with your young reader!

Phonics Focus
After reading page 2, ask your child what is similar about the words *plum* and *place*. Guide them to see that they both start with *pl*. Have your child say each letter separately and then practice blending the sounds. Together, list other words that start with *pl*.

Connection to Movement
Have your child create three to five movements that relate to pages in the book. For example, they could pretend to get off a train for page 3, pretend to step on the gas for page 6, and pretend to smack toy frogs for page 10.

Connection to Art
Have your child think of activities they would like to do at a fun place like the ones and Nick go to. Have them create a comic strip with four panels to show the activities they would do.

- 180 titles
- 120 Spanish titles
- Ages 4–10
- Publication Date: July 2019
- Paperback • 12–32 pages
- 5.25 in. x 8 in. or 7 in. x 9 in.

Exploring Reading

Build strong, independent, and excited readers

- Motivate readers to master foundational reading skills while building a joy of reading.
- Readers are captivated by the diverse themes and topics covered by TIME For Kids® content, offering complex informational texts that actively engage learners of all levels.
- 180 titles available!

TIME FOR KIDS® publishes a weekly magazine engaging students with authentic journalism, inspires discussions on current topics, and provides teachers with valuable resources for the classroom.

Our partnership allows us to transform the authentic articles into high-interest information text for leveled kits and readers, writing programs, and comprehension and critical-thinking resources.

Building a Library

When you want to read, do you have a lot of books to choose from? Finding the perfect book is fun! But there are many people who cannot afford books.

Maria Clara is one of them. She lives in a village called Serrote (seh-HOH-chee) in Brazil. People in her village are poor. They are too poor to buy books. Some of them cannot read very well.

This is what inspired Maria. She came up with a way for people in Serrote to have access to many books. Some neighborhoods have two or three libraries. But in Maria's area, libraries did not exist.

Lots of Free Stuff

Have you ever been to your local library? You can borrow books, magazines, and even movies. And it's all free, as long as you return your items on time!

Try It!

You have taken a special interest in the problem of the Great Pacific Garbage Patch. You are determined to do your part to protect the ocean from further pollution. You have decided to start a schoolwide recycling program. Design a plan to address the environmental issue at your school.

- ✦ Using this book and outside research, gather more information about the Great Pacific Garbage Patch.
- ✦ How will you motivate other students to take part?
- ✦ What does your recycling program look like? How will waste materials be divided?
- ✦ In what ways can you educate your school community about ocean wildlife and the effects of pollution?
- ✦ How will you present your plan to the school? Be creative!

LICENSING INFORMATION

- 72 titles
- 64 Spanish titles
- Ages 4–13+
- Publication Date: July 2018

- 5.25 in. x 8 in.

TIME FOR KIDS® Nonfiction Readers

Dynamic nonfiction books with TIME FOR KIDS® content

- Motivate students' curiosity and interest using the dynamic imagery and content from TIME FOR KIDS®.
- Offers a diverse array of text structures seamlessly integrating science, social studies, and math concepts.
- 255 titles available!

TIME FOR KIDS® publishes a weekly magazine engaging students with authentic journalism, inspires discussions on current topics, and provides teachers with valuable resources for the classroom.

Our partnership allows us to transform the authentic articles into high-interest information text for leveled kits and readers, writing programs, and comprehension and critical-thinking resources.

What Is a Mammal?

They come in many shapes and sizes. They may swim in oceans or run through deserts and fields. Some climb trees or cliffs. They live in rainforests, frozen places, and even in your home. What are they? Mammals!

4 jaguar

orca (killer whale)

5

There is at least one mammal living in your home. You! Humans are mammals.

ON THE GROUND

Each day, people interact with the dirt, soil, and land. They harvest food and energy to sustain themselves and their communities. The land benefits people in many ways. It provides food and water to eat and drink, wood to burn and build with, and coal and oil to help machines run. The Earth is precious to us, but this precious commodity can become tainted or polluted. It can collapse, destroying itself and the people nearby. It can even become **barren**, dried up, and unable to grow plants. If we destroy the very land we live on, where will we live? Where will we farm? And what will we eat?

SUSTAINABLE FARMING
Farming requires a lot of water and energy. Sustainable farming happens when farms grow products that can be grown again easily and naturally. This type of farming is gentle on the Earth and leaves less room for disasters.

Large vehicles are used for a wide variety of tasks and require large amounts of fuel.

Wood is burned to create heat and is used as fuel.

FOSSIL FUELS
Fuel is needed to make everyday things such as dishwashers and cars run. But the fuel must come from somewhere. The fuel we use has been stored underground for thousands of years. When Earth is damaged, our resources are also at risk.

Inspire curiosity, perserverance, and wonder

- High-interest STEAM book focus on global problems and innovative solutions.
- Each book includes a hands-on challenge to guide students through the engineering design process and empower them to find creative solutions.
- 90 titles available!

The Smithsonian Institution is the world's largest museum, education, and research complex.

Through our collaboration, we create grade level STEAM kits and readers that inspire students' curiosity, persistence, and wonder about the world.

More than 200 types of cells are found in human bodies. Human cells have varying sizes and **densities**. Most cells in humans are so small that they can only be seen under a microscope. Cells are in a continuous state of change and **replication**. Different types of cells divide and multiply at different speeds. These factors make it difficult for scientists to know the number of cells in one person. However, recent estimates put the number at a whopping 36 trillion cells for an adult male.

All this change and replication can be a good thing when it comes to healing. In normal functioning, cells are constantly renewing the human body toward health and wellness.

Microscopes allow the structures of cells to become visible to human eyes. These are what human cheek cells look like!

MATHEMATICS **How Many Cells?**
You have more cells in your body than there are stars in the Milky Way—trillions more, in fact! Scientists estimate that there are between 100 to 400 billion stars in the Milky Way. In comparison, every human body has trillions of cells. One trillion is equal to 1,000 billion.

How Cells Come Together
In human bodies, various combinations of cells join to form tissues. Some examples of tissues are blood, **muscles**, fat, and bones. Organs, such as the liver and heart, are made up of several kinds of tissues. Each organ performs a specific function. For example, the lungs take in oxygen and release carbon dioxide. Together, organs and tissues make up bodily systems. These systems complete more complex tasks, such as digesting food or controlling bodily movements. Systems keep human bodies stable and healthy, all while supporting the tasks of daily life. Understanding these systems allows us to learn what happens in the body in a healthy state.

STEAM CHALLENGE

Define the Problem
You and your friends like to surf, but it is tough to get all your boards to the beach. You saw a foldable kayak and are wondering whether you can create a foldable surfboard that would be easier to transport and still hold up after use.

Constraints: Your surfboard should not bend or buckle when placed in the water.

Criteria: Your foldable surfboard must reduce its length or width by at least one half and should be buoyant in water.

Research and Brainstorm
How will folding a surfboard affect buoyancy? What folded shape will be easiest to transport? What materials will work best? Are any extra supports needed at your folds? Search the Internet for ideas that might inspire you.

Design and Build
First, make a paper model of your surfboard to decide how your board will fold. Then, sketch your design. List materials you are using in your model and materials that could be used in an actual foldable surfboard. Then, build your model.

Test and Improve
Create waves in a container of water to test how your surfboard holds up. How did your board perform? Can you decrease the size of the folded surfboard even more? Modify your design and try again.

Reflect and Share
How might a foldable surfboard compare to a regular surfboard? Consider the pros and cons of each. Which would you prefer?

CAREER ADVICE
from Smithsonian

Do you want to learn about surfing? Here are some tips to get you started.

"Study mathematics and science so you understand how waves and speed work. In high school, take physics classes to learn about motion. Those skills will help you improve your surfing!"
—Jeffrey Brodie, Museum Program Specialist

"Surfers are not the only 'wave chasers' out on the ocean. There are scientists learning about waves that occur on the ocean floor. Some of these waves are the size of skyscrapers. Where they go and what they will tell us is all not known. Maybe you can be the scientist who figures this out!"
—Emily Frost, Ocean Portal Managing Editor

SCIENCE READERS

Help kids explore, collaborate, inquire, and think critically about science!

- Inspire exploration with these fascinating books covering life, physical, and Earth and space science concepts.
- Features hands-on, simple science experiments.
- 96 titles available!

Get a Grip

Friction doesn't just help you make fire. Your fingerprints and tennis shoes use friction, too. The ridges on your fingers help you hold a pen or a ball. The ridges on the bottom of your shoes help you grip the floor. Hiking boots have deeper ridges for better traction.

Flies and some reptiles seem to walk anywhere, even on glass! Their feet look smooth. But they have many hairs used for gripping on the bottoms of their feet. And those hairs have some sticky stuff that adds to their traction.

Sticking Together
Traction helps things stick. You want your shoes to have good traction so you don't slip.

This is a close-up of a fly's foot.

Acceptance

When a scientist works, he or she doesn't keep their work quiet. The scientist shares his or her work with other scientists, and they experiment, too, to see if they get the same or different results. When others review the scientist's work, they either accept it or reject it. If most experts accept it, the work is considered "good science," and it begins to be used to support other inquiries.

And on and on it goes.

biologist

botanist

chemist

No Secrets

If no one else is allowed to test something that a single group of scientists test, any so-called evidence is not good science. Good science is always public and testable.

Consensus

It is very hard for a group of people to reach perfect agreement on anything. Think about the times that you and your friends try to agree on what to do. In science, as long as the majority agrees and just a few don't—even if the dissenters are loud and insistent—we consider it a consensus.

Acceptance of a scientist's work depends on the evidence that supports it. Other scientists have to be able to test it and get the same results. They have to see that the evidence is valid and accurate. Science experts must reach **consensus**, which means they have to agree on approving the work.

Of course, not everyone has to agree. Let's face it, there will always be those people who just like to make a fuss and disagree with things. Some won't like the results, or they might have their own ideas about how things should go. The scientist doesn't have to do anything to get those people to agree. But good science should hold up when objective scientists check it out.

YOUR TURN!

Finding Evidence

Look on the ground outside at a park or a playground and gather evidence as to what activities have recently been done there. Do you see footprints? Are they big or small? In what direction did the person walk? Challenge a friend to see who can find the most evidence.

MATHEMATICS READERS

Explore mathematics topics in fun and meaningful ways!

- Explore mathematics topics in fun and meaningful ways while building both literacy and problem-solving skills.
- Each engaging book vividly demonstrates the real-world applications of mathematical concepts, fostering understanding and appreciation for math concepts.
- 140 titles available!

Problem Solving

The Leaning Tower of Pisa is a famous landmark in Italy. Imagine that you have been asked to design two new towers based on the original structure. Use the information to plan your towers. Then, draw diagrams to tell more about them.

- The Leaning Tower of Pisa has 294 steps. Use this fact to plan the first tower.
 - Use the digits 2, 9, and 4 one time each to create the greatest three-digit number possible. This will be the number of steps in your tower.
 - Which tower has more steps: yours or the original? How many more steps does it have? Explain your reasoning with words, numbers, or pictures.
 - How many steps do both towers have? Explain your reasoning with words, numbers, or pictures.
- The Leaning Tower of Pisa is about 186 feet tall. Use this fact to plan the second tower.
 - Use the digits 1, 8, and 6 one time each to create the least three-digit number possible. This will be the height of your tower.
 - Which tower is taller: yours or the original? How much taller is it? Explain your reasoning with words, numbers, or pictures.
 - What is the height of both towers? Explain your reasoning with words, numbers, or pictures.

It's Showtime!

Back on the train, they make their way to the final stop. In about an hour, Stella will see the greatest fireworks display in the world. She feels a strong appreciation for all the hard work that goes into putting on the show. She can't wait to see what the Canadian team has planned. She looks forward to the artistry of the Spanish team's show. She hopes to learn from the techniques that the Chinese team will use.

She thinks about her father and how much work he puts into each of his fireworks displays. She hopes that her experience will soon give him the answers he needs to once again feel connected to his work.

The sun sets, and the sky darkens into a black canvas. The stage is set for the Fireworks Festival. Huge crowds begin to fill every part of La Ronde. People search high and low for places to view the fireworks. People in the city even settle on rooftops and in trees to see the show. Around the lake, teams run back and forth as they make final preparations.

Yippee guides Stella and her mom to their seats. Stella anxiously awaits the start of the show.

LET'S EXPLORE MATH

A ticket for a reserved seat at the festival costs about 54 Canadian dollars. Suppose that 36 people in a tour group want reserved seats. Use partial products to show how much their tickets cost altogether.

$$\begin{array}{r} 54 \\ -36 \\ \hline 24 \\ \hline +1,500 \\ \hline \end{array}$$

LEISURE ACTIVITIES AND GAMES

Romans enjoyed races and games. A popular sport was **chariot** (CHAIR-ee-uh) racing. Races were held in stadiums or **coliseums** (kaw-uh-SEE-uhmz). Thousands of people came to watch the races. Two or four horses pulled the fast chariots. Sometimes elephants or camels were used instead of horses. There could be as many as 24 races in a single day.

Gladiator (GLAD-ee-ay-tuhr) games were also very popular. Men fought against animals and each other. Many men fought to their deaths. It was a very violent, terrible sport. Thousands of people watched the

▼ The ruins of the Roman Colosseum still stand today.

▲ The Circus Maximus was a popular site for chariot racing.

bloody battles. The huge Colosseum (kaw-uh-SEE-uhm) in Rome was the most famous arena for this event.

Performances in theaters were also a popular pastime. Roman plays were based on plays from ancient Greece. Successful actors were popular like movie stars are today.

Roman gladiators were very violent.

Family Fun

The sports stadium in Rome was called Circus Maximus (MAK-uh-muhz). Men and women were allowed to sit together. So, chariot races became family events. Food and drinks were sold, too.

The Invention of Pantomime

The Romans invented new ways to perform at the theater. One example was pantomime (PAN-tuh-mime). An actor would dance and mime a story to music.

Famous Heroes

Gladiators were the sports stars of the day. Some of them became rich and famous. It seems strange to people today that Romans liked this type of sport. The violence is much worse than any sport today.

Landmarks Around the World

Read and Respond

1. What is a landmark?
2. What is the difference between natural landmarks and human-made landmarks?
3. Why were the pyramids of Egypt built?
4. What problem did the Millau Viaduct solve?
5. Why are certain people chosen to be honored with monuments?
6. How has technology influenced the design and creation of landmarks?

The Great Barrier Reef

The Great Barrier Reef is located off the coast of Australia. It is the world's largest coral reef ecosystem. It stretches more than 1,250 miles (2,000 kilometers). Like all coral reefs, it is a living thing. Coral reefs are formed mainly by tiny creatures called polyps. Living coral polyps at each themselves to the skeletons of dead polyps on the reef. When they die, their bodies harden into skeletons. The reef grows as more and more polyps attach themselves.

The Great Barrier Reef has the most diverse reef ecosystem in the world. There are 430 species of hard coral at the reef. Scientists have found that more than 1,500 species of fish live there. Fish rely on the reef for shelter. They also feed and raise their young on the reef.

Healthy coral reefs are beautiful. That is one reason the Great Barrier Reef is popular with tourists. More than 60,000 people have jobs associated with the reef. Tourists need boat guides to visit the reef. They have to take boats to get there. Fishing and diving equipment are also needed. Plus, tourists need places to stay and places to eat. This has created jobs that are good for Australia's economy. It is a delicate balance, though. If tourists accidentally damage the reef, the fragile environment becomes stressed. This causes harm to the coral.

What's Happening to Reefs?

Coral reefs around the world are in trouble. Climate change is one problem. Climate change is making the water warmer and more acidic. This is causing coral to die. Scientists are working to help reefs. Healthy reefs are important for many people.

HELLO, BEECH TREE!

by Rasha Hamid, illustrated by Sofia Moore

A kindergarten class pays homage to their beloved lost beech tree and takes action to plant a new one

- Incorporates community action, creative expression, collaboration, and environmental conservation in a lyrical story
- Based on true events and the author's city-based kindergarten class
- Taps into the power of nature to connect and inspire children wherever they live
- Vibrant art highlights a diverse group of children in an urban nature setting
- An endnote invites readers and caregivers to take nature-focused action in their own communities

Free Spirit Publishing*

9798885540377 · Hardcover

Pub Date: June 2024

Ages 4–9

40 Pages · 8 in. x 10 in.

Rasha Hamid has developed her practice in classrooms throughout New York City for over twenty years. She began creating picture books with her classes to fill the need for books reflecting her students, their experiences, and their passions. Rasha's first book with Free Spirit was *How to Bird*, a joyful exploration and celebration of birding that invites all children to take part.

I Think I Think a Lot

by Jessica Whipple, illustrated by Josée Bisailon

A young girl notices, and celebrates, her way of looking at and experiencing the world

- Features a main character with an unnamed neurodivergence, allowing readers to see themselves in the story
- Inspired by the author's experience with obsessive-compulsive disorder (OCD)
- Story will also be relatable for children with anxiety, ADHD, autism, giftedness, and perfectionism tendencies
- Can be a starting point for discussions about overthinking or obsessive thoughts and about the many ways individuals see and experience the world
- Emphasizes self-acceptance and helps readers increase empathy through understanding and acceptance

Jessica Whipple (authorjessicawhipple.com) is a writer for adults and children. She is the author of *Enough Is . . .* (March 2023, Tilbury House) and *I Think I Think a Lot*. Her poetry has been published in print and online literary magazines. To read more of her work, visit her website or follow @JessicaWhipl17 on Twitter.

Papa and Pearl

by Annette M. Clayton, illustrated by Kim Barnes

Sweet story of the love between father and daughter that stays constant, even through big change

- Strong father-daughter connection with a positive portrayal of fathers, challenging gender stereotypes
- Book features divorce in a new and fresh way, focusing on the father-daughter relationship, not the divorce itself
- High interest and imaginative picture book can be enjoyed by all children, and especially children who love pirates, princesses, or mermaids
- Written by an author with Puerto Rican and Irish heritage whose inspiration for this story comes from the people in her life

Ages 4–9

36 Pages · 8 in. x 10 in.

Annette M. Clayton writes books for children with social and emotional learning themes in the hope that they inspire open dialogue, encourage empathy, and let children know they are not alone in their feelings and experiences. She is the author of a Latinx holiday book *Hooray, It's Three Kings Day!* and a forthcoming chapter books series.

Quiet Violet Finds Her Voice

by Gabrielle Nibus, illustrated by Stephanie Dehennin

Violet's journey to be heard celebrates the power of bold, quiet people

- Celebrates the power of quiet people and recognizes that the mind of a quiet child is as rich and bold as that of a more extroverted child
- Empowers introverted kids to find their voices and discover their passions
- A section for adults shares discussion questions and activities to use with children
- Incorporates themes of finding your interest/passion and quietness/shyness community or youth group, or beyond

Addy's chair to Everywhere

by Debi Novotny, illustrated by Jomike Tejido

Celebrate children's imagination, friendship, and inclusive play

- Disability representation: the main character is disabled and uses a wheelchair
- Story helps the reader see the whole child, which includes but isn't limited to her wheelchair
- Rhythmic, rhyming text engages young readers
- Highlights the importance of understanding differences and shows that children have more fun when they work and play together and include everyone

Free Spirit Publishing*

9798765922477 · Hardcover

Pub Date: August 2024

Ages 3–6

36 Pages · 10 in. x 10 in.

Debi Novotny is a children's book author and a former elementary school teacher. When she got sick with cancer, she had to travel around school in a wheelchair. Debi met new friends who also traveled in wheelchairs, and they became a special part of her classroom community. She wrote this book for all children who create new and inclusive worlds when they play.

How to Train Your Amygdala

by Anna Housley Juster, illustrated by Cynthia Cliff

Your amygdala works hard to protect you from danger, but sometimes it gets things wrong.

- Anxiety in young children is on the rise, so learning to calm the amygdala is an important self-regulation skill for all kids
- Teaches anxiety-calming and mindfulness strategies like deep breathing, visualization, and progressive relaxation
- Book helps young children learn complicated concepts and increase their capacity for change through the power of humor, interactivity, and empathy
- An endnote includes an amygdala's training playbook for kids and more information for adults to help reinforce the book's message

Anna Housley Juster, Ph.D., LICSW, is an early childhood education consultant and mental health clinician who has over two decades of experience supporting children and families across a variety of contexts. For many years, she served as the director of content for the preschool television series Sesame Street, working on the series and across the brand, including publishing, product development, and interactive technologies.

Sonia and the Super-Duper Diaster

by Rachel Funez, illustrated by Kelly Kennedy

Sonia's adventure-filled story with worry-fighting gadgets helps kids learn how to cope when it feels like everything is going wrong

- Celebrates the individual strengths and special qualities of neurodivergent children
- The main character helps children with ADHD and anxiety recognize how their bodies feel when they become anxious and overwhelmed and shows them how to calm down and access their strengths
- The coping skills in the book are framed as worry-fighting gadgets to make them memorable and fun to use
- Author has ADHD and anxiety and uses the self-regulation tools from this book

Free Spirit Publishing*

9798885543903 · Hardcover

Pub Date: July 2024

Ages 4-9

40 Pages · 8 in. x 10 in.

Rachel Funez was born in the United States, spent most of her childhood living in Latin America, and is now an attorney raising multicultural children in Peru with her Honduran American husband. Rachel knows exactly what it's like to have ADHD and anxiety. She wishes she could hug every kid who is struggling with overwhelming feelings, but she will settle for creating stories that celebrate children with special brains and help them cope with their big emotions in productive ways.

I Love Harriet Kippley

by Jenny Lynn Pease, illustrated by Alessia Girasole

Inspire kids to love and celebrate themselves with Harriet's quest to find the perfect drawing subject

- Sweet, humorous, lively, and charming read-aloud with a simple message of self-affirmation
- Can be used to start conversations with kids about developing self-confidence and recognizing personal strengths
- A section at the back of the book offers discussion questions to help kids develop self-awareness and kindness for themselves and others, help them learn to manage frustration, ask for help, and celebrate their own unique qualities

Jenny Lynn Pease has loved writing since a young age. A former early childhood educator and current mental health advocate, she hopes her books make children feel happy, curious, and inspired.

Ages 5–10

36 Pages · 10 in. x 10 in.

Ty Chapman is an author and poet. In addition to *James Finds the Beat*, he is the author of *Sarah Rising*, *Looking for Happy*, *Stokes* (written with John Coy), and *Tartarus*. Ty was a 2022 Center for Arts + Social Justice Fellow, an award used to support a speculative work in progress with social justice themes. He was also a Mirrors & Windows fellow, as well as a Mentor Series fellow and a finalist for Tin House's 2022 Fall Residency, Button Poetry's 2020 Chapbook Contest, and Frontier Magazine's New Voices Contest. He holds a master's degree in writing for children and young adults from VCFA. When Ty isn't writing, he's usually playing pickup basketball, playing board games with his friends, or petting his two cats, Alabaster and Hobbes.

It Won't Ever Be the Same

A Teen's Guide to Grief and Grieving

by Korie Leigh, Ph.D.

Help young people name, express, and give shape to their grief with this book on grieving for teens

- Reflections, analogies, and suggested activities guide teens in working through and making sense of their personal and complex grief experiences
- Validates and reassures book teens experiencing grief, providing them with tools to understand, express, and cope.
- Touches upon big milestones in the grief journey, starting with new grief and continuing through the days, weeks, months, and years after

Dan McCauley was raised by little league coaches, a caring community, and his family’s love, Dan pursued his passion for teaching and storytelling at NYU. After working as a teacher in the Bronx, he moved to Los Angeles, where he work with students as a learning specialist. Dan writes and teaches with the same sense of awe, wonder, and gratitude he feels toward the world. Whether coaching on little league baseball fields, teaching in middle and high school classrooms, or telling stories, the question that continues to inform Dan’s work is: what helps young people heal, grow, and thrive?

OUTSIDE OUR WINDOW

Introducing Outside our Window Board Books

A beautiful, community-focused series encourages children—especially those in urban neighborhoods—to explore, protect, and delight in nature. Each book in the series focuses on one feature of the natural world (like birds), one sense (hearing), and one social or emotional learning skill (communication). The books follow cousins Kamali and Josian on a joyful journey through the seasons as nature beckons them outside where they question, wonder, and play!

Birds Sing Their Words

Awaken young children to the sounds birds make, and to their own unique voices.

Focused Instruction

Focus on reading and math skills

- Reinforce reading comprehension, academic vocabulary, and writing through fun and engaging reading passages and activities.
- Teach students key skills and how to be active math learners, including common metacognitive strategies like copy cover compare-cover copy compare and thinking aloud on their own.

LESSON 8
Legless Fearless

Some athletes have come back to peak fitness after losing limbs. Others have made it to the top with bodies that seem limited. Aimee Mullins is one such athlete.

Mullins was born without important bones in her lower legs. Her legs were taken off below the knee when she was a baby. But Mullins was strong. She was confident. She had a great outlook on life. So, she learned to use prosthetic legs. Prosthetic legs are made of metal or other materials. They are made by people. Mullins became a top track and field athlete with her new legs.

Mullins now works as a fashion model. She walks the runway to model new clothes. She also models for a famous makeup company.

Many people admire Mullins and her story. They want to know more about how she achieves so much. Mullins is happy to tell them. She gives speeches. She helps people see what they can achieve. Mullins explains that her legs give her "superpowers." She doesn't see her legs as a problem. She sees them as a great gift. In fact, she has many different pairs of legs. She chooses a pair each day depending on what she wants to do!

Mullins is not only a fashion model. She is also a model for living well.

Name: _____ Date: _____

Word Work

Part 1: Word Families

Directions: Add the beginning sounds from the Beginning Sound Bank below to -ack and -ake to create new words. Then, write the new words in the correct column of the chart.

Beginning Sound Bank	
h	st
br	s
tr	bl
cr	f
p	fl
back	-ack
brake	-ake

Part 2: Language and Vocabulary

Directions: Circle the word that best completes the sentence.

1 Will you take a quick _____ at this letter for me?
 examine look observe

2 Make sure to _____ hot tea so you don't burn your tongue.
 gulp drink sip

3 She had to _____ to the store because she was running very late.
 stroll race skip

LESSON 13

Food Drive

Directions: Solve the word problems.

1 Faith and Keaton donate canned goods for a food drive. Faith brings her cans in bags. She has 6 bags, with 7 cans in each bag. Keaton brings 24 more cans. How many cans did they bring together?

Picture	Equation
Solution	

2 Maria and Caden collect jugs of water at the food drive. Maria collects 22 jugs. Caden collects 28 jugs. They put all the jugs together. Then, they put them into boxes. Each box holds 5 jugs. How many boxes did they fill?

Picture	Equation
Solution	

3 Explain how you solved Question 2.

Name: _____ Date: _____

Party Time

Directions: Solve the word problems.

1 For a third-grade party, the teachers ordered 10 large sub sandwiches. Each sub was split into 6 pieces. The students ate 45 pieces. How many pieces were left?

Picture	Equation
Solution	

2 The teachers also bought apple slices. They bought 6 packs of apples. Each pack had 5 slices. Each student ate 3 slices. If there were no leftovers, then how many students got apple slices?

Picture	Equation
Solution	

3 Choose Question 1 or 2. Explain how you solved it.

There's Research for That

Your K–5 Literacy Instruction Questions Answered

by Heidi Anne Mesmer & Katie Hilden-Clouse

A clear and actionable guide to making sense of and implementing the Science of Reading

- Presents and explains important research related to literacy learning
- Builds classroom teachers' awareness of best practices and the reasons behind them
- Answers common questions about teaching literacy, such as how many letters to teach per week and the benefits of teaching handwriting in a digital world.
- Uses an engaging question and answer format that supports quick reference
- Maintains compatibility with various literacy curriculums and reading programs

Social-Emotional Learning Starts with Us

Empowering Teachers to Support Students

by Trisha Di Fazio and Allison Roeser

Empower educators to develop and practice their own social-emotional learning (SEL) skills, so they can effectively address their students' needs.

- Digs into key SEL topics such as the 5 SEL Competencies, mindfulness, and feedback
- Provides strategies for implementing SEL in every day instruction
- Includes testimonials from teachers on how they have implemented SEL in their classroom
- Empowers educators to explore their own SEL skills through reflective activities
